Funeral Services For Mrs. Verena Redd

RAYMOND PAYS FINAL TRIBUTES, PIONEER WOMAN

Services over the remains of Mrs. Verena B. Redd were held in the L.D.S. tabernacle here Saturday and were marked by a large attendance, representative of friends from Raymond and the entire district, also, sister towns of the southern Lethbridge.

Presidents H. S. Allen and O. H. Snow and Mrs. T. J. O'Brien were the principal speakers all of whom eulogized the life of a noble woman, of pioneer stock and mother of 11 children, ten of whom survive her.

President Allen said he considered it an honor and a privilege of speaking at the services. "I have always been impressed with her devotion to duty and her family who have grown up to splendid men and women" he continued.

He referred to the splendid character of the husband who died about 23 years ago and he expressed sincere appreciation for the life of Mrs. Redd who subsequently raised a family of very active citizens. The president was mindful of the good lives of the sons and daughters of the deceased whom he had watched grow into manhood and womanhood and of whom he was pleased to state were among the leaders in their respective communities.

Elder O. H. Snow, in terms of deep gratitude, expressed his appreciation for the lives of the deceased husband and wife. He referred to their integrity and of the sterling qualities of both. They were pioneers who had assisted in the colonization of southern Utah and also, pioneered here when Raymond as a settlement was in its infancy.

Mrs. T. J. O'Brien's remarks paid tribute to the life of Mrs. Redd whose devotion to service covered a period of 26 years actively engaged in Relief Society work. "She was more than a friend. Just like a dear sister who never complained of her church responsibilities in spite of having a large family which required so much of her time. She had a heart full of love for her associates and my life has been made better through her," she said.

Very appropriate music was rendered by the choir under the direction of W. W. McMullin, ward choir leader. A vocal solo by Mrs. Blanche Scoville entitled "One Sweetly Solemn Thought" was rendered and a male quartette under the direction of Frank R. Taylor, entitled "Crossing the Bar" was very effectively rendered.

A most unfortunate feature of the funeral was the absence of Lyman, Vilo and Mary, son and daughters of the deceased, who came as far as Coult, but immigration regulations prevented them from coming any farther, and they were compelled to return without the privilege of attending funeral services of their mother.

Interment was at the city cemetery with M. E. Christensen of Lethbridge in charge.

Allen Erickson of Wrentham visited his parents here for a few days this week.

Bright skies greeted residents Friday morning after four days of nearly steady rain. Crops and gardens will certainly grow rapidly now with warm weather after the bounteous rainfall.

Mr. Farmer! When you get ready to summer-fallow, try a drum of Red Distillate in your tractor. We are sure you will like it. D. A. Watson, Agent.

News Notes

Nerv Nox—the gas that never fails! Try it. See D. A. Watson.

Make your appointment for the Capitol Saturday. Free chest of Community silver or \$20.00 in cash.

J. U. Allred was on the ridge Monday last and said it rained nearly all day long up there.

The U. S. dry area has spread into Maine, and crops there are seriously threatened now according to reports.

There are some who are growing now about how much rain we have had. Some people are never satisfied anyway, no matter what they get.

Political prophets are predicting a Provincial election this summer, and points to the storm cabinet shake-up, and several other things as reasons.

Travelers to Lethbridge Monday afternoon and evening reported the road as covered with water, and in many places quite slippery so that driving was a slow and laborious job.

Huntington Beach, California was rocked by an explosion of gasoline tanks Saturday, but as far as could be learned no one was injured. A loading pipe carrying high test gas broke and sprayed gas into a fire box. The explosion rocked the city like an earthquake.

A postal rocket from England to France has been tested successfully, and may be the forerunner of regular rocket mails. Speed is reckoned at 20 miles a minute, and would give Britain and France one minute mail service from Dover to Calais.

Conference visitors from Raymond to Salt Lake include: Pres. H. S. Allen, Mrs. H. F. Allen, Mrs. Wm. Redd and William C. Stone, in H. F. Allen's car, and Bishop and Mrs. J. Walker. Mrs. O. R. Knight and Miss Mildred Galbraith in Bishop Walker's car. Bishop Walker will bring Harris and Fay home from the B.Y.U. when he returns.

R. R. Murray of New Dayton and N. Brandley of Stirling, members of the Municipal Council, had to go around by Lethbridge Tuesday in order to get to Council meeting. Too bad the Stirling-Craddock cut-off wasn't gravelled a few years ago when the plans were all laid, isn't it boys?

The leather windbreakers which are being presented to the members of the Union Jack Basketeers are on display in the window of the Broadway Store. Made of calf skin, with silk linings and a basketball and the words Jacks on the left breast they are nifty indeed. They were specially made by the Great West Garment Co. of Calgary.

Forest fires in Eastern Canada and Newfoundland are doing millions of dollars damage to timber stands and destroying many homes in the settlements they are ravaging. Fisher folks in several villages were forced to gather up what they could carry and flee to their boats for safety and put out into the water to get away from the flames. 13 separate fires were burning in the Sault St. Marie area, ten believed to have been caused by lightning and three from carelessness campers. The rain, at last reports had not reached these areas.

It Has Rained!

Despite all signs and beliefs to the contrary, we have had a week of rainy weather, a real old fashioned soaker, which has not been duplicated in the last several years, ranging all the way from seven to twenty according to chronologists, who have been scratching their heads to decide just when we had such a rain as we have been and are getting this week. No tremendous cloudbursts, just a good steady down pour, light at times, heavier at others, but coming almost twenty-four hours a day and soaking down, well no one knows how far, but up to Thursday morning rain gauges measured about 2 inches, and that is enough to go down a long way.

Fields are soaked to the saturation point, and pools are forming in the low places, bar pits are young seas, and low places in the roads presents hazards for the unsuspecting car driver who hits them and then has a nice shower of rain and mud all over his car as a result. Grass is looking green and healthy again, where it was dry, parched brown before, and beet look as though they have grown two inches during the storm.

The hopper pest, which was serious in many quarters, will be checked, if not eradicated by the storm, and the cut worms will find the wet earth very unpleasant and will likely curl up and die in disgust. Gophers in low places will likely find their homes a cold and wet one and will be forced to seek higher ground. While we have not seen any gophers drowned out, it is likely that hundreds have perished, so that aside from the benefit to the crops and pastures, the destruction of pests will be a big saving to the farmers and all concerned, as gopher and hopper poison are expensive and sooner or later the farmer and taxpayer has to pay his bill!

Rejoice in the rain, and after all the kicking we have done, due to drought, let's not holler too quick about the rain being too much—LET IT RAIN.

Community, the world's best silverware. A cabinet given FREE Capitol Saturday.

Autolene Oil and Greases will preserve your cylinder walls better than most others. Get it from D. A. Watson.

The regular meeting of the "Bonne Amie" club took the shape of a bridge party and was held at the home of Mrs. J. T. Simpson. Honors for cards went to Mrs. Thea Nielson. The tables were decorated with fresh flowers and the hostess served a delightful lunch.

Dipping Sheep

All sheep on the station were dipped here last week and in view of the importance that obviously attached to this annual event sheep dipping has been selected as the topic for this week's letter. The main purpose in dipping sheep here is to destroy ticks. These are a kind of a wingless fly, and are in fact, not a true tick, but which are it seems attracted to sheep like fleas are to a dog and they are much more harmful because they are a blood sucking parasite and can and do cause great distress to sheep and even death if left uncontrolled. A sheep infested with ticks makes very slow gains and the wool is much damaged.

Dipping is the effective and practical means of controlling ticks and at this station a regular vat is now used. Formerly when the station numbered 50 sheep or less a small galvanized tank served very well. When seen from the side this tank appears somewhat like a deep bath tub that slopes at one end and is square at the other. It measures 8 feet long at the top and 4 feet at the bottom. From the end the tank is somewhat V shaped in that it is 24 inches wide at the top, is 3.5 feet deep and only 8 inches wide at the bottom. When in use it is dug in almost level with the ground and besides trenches on either side of the tank for the attendants a place is made for a fire to keep the dipping solution warm. In dipping in this small tank each sheep was immersed, feet up, and held in the solution for one half minute.

For a flock of 100 sheep or more, the small dipping tank is inadequate and a regular dipping vat is essential. The one at this station is very satisfactory. It consists of a wooden vat, 30 feet long, 26 inches wide at the top, 6 feet deep and 11 inches wide at the bottom. All but the top foot of the vat is below ground level. This vat holds 1230 gallons when filled to 5 feet, 1045 gallons to 4.5 feet, 950 gallons to 4 feet, 729 gallons to 3.5 feet and 590 gallons when filled to 3 feet.

In estimating the quantity of dip needed, one gallon is allowed for each sheep. In swimming the length of the vat each sheep takes up enough dip to kill any ticks it may be carrying and with the narrow vat the sheep are prevented from turning back once they have started to swim through, while the narrow bottom of the vat reduces the amount of unused solution to a minimum.

At the plunging end of the vat is a round corral 12 feet in diameter. Two gates attached to a post in the center are used to crowd and hold the sheep near the vat where they are shoved in.

At the other end of the vat are two draining pens 12 feet square and provided with board floors that drain into the vat. Dip from the dipped sheep drains back into the vat and is not wasted. A gently sloping runway with plenty of cross pieces makes it easy for the sheep to get out of the vat, and slats in the floor at the landing and also at the outlet gates prevent slipping.

Eight men make a complete crew. Two to herd, three in the plunging corral, and three at the vat and in the draining pens. Starting at 8:30 a.m. and finishing before noon eight men at this station this year dipped 607 lambs, 537 ewes and 42 rams, besides a lead sheep and three sheep dogs. Sheep are never dipped later than 4:00 in the afternoon to give them time to dry off before night. Coopers Powder dip is used. This gives very satisfactory results when used according to directions.

Notes On the Municipal Council Meeting

Good Attendance At Demonstration

Sponsored by the Canadian Utilities Limited, the demonstration on Tuesday of the uses of the Electric Range and the Electric Refrigerator was largely attended by a large and interested audience of Raymond housewives, who were there full of questions regarding various phases of electric housekeeping. Mrs. Dr. G. W. Leech was in charge of the practical end of the demonstration and was assisted by officials of the Utilities staff and a General Electric representative also. Approximately 200 attended during the day, and for the full time of the program the show room of the Utilities store was packed with ladies.

Eighty sets of recipes were given out, and a large number more have been ordered to supply those whose names were taken because of a shortage of recipes to go around. The ones responsible for the Demonstration were very well pleased with its success and it is likely that others will be arranged before many months for those who were unable to attend Tuesday.

Surprise Party

Mr. and Mrs. Ira McBride were pleasantly surprised Monday evening on the anniversary of their 15th year of wedded life when eighteen of their relatives and friends met at their home and spent the evening with them.

The visitors brought all the essentials for a big supper, and while the ladies prepared the sumptuous repast, the men folk and ladies who couldn't find anything to do played games, and made merry with the guests of honor. The evening was a decided success.

Those present were the following and their wives: A. J. Walton, E. H. Price, C. F. Fawns, L. C. Woolley, J. H. Blackmore, T. W. Meldrum, H. E. Pryner, T. T. Mendenhall, Reed Litchfield, and Miss Edith Woolley.

First step in the readjustment of the NRA is seen in the suspension last Monday by President Roosevelt of price fixing provisions of service industry codes. Child labor, minimum wages, and maximum hour regulations remain in force.

The Municipal Council of Sugar City met in their regular session Tuesday afternoon last, and took up the business of the district for the month.

The Councilman from each of the six districts was given an allotment out of the current years levy, which amounted to about \$2,500.00 after the regular expenses of administration had been taken out, which amount will be used, if necessary, to finance farmers who are working out arrears of taxes on road work. In addition to this it was decided to work out 40 p.c. of the arrears of the Local Improvement tax on the roads in order to build up and maintain the roads, and to give the farmers a chance to get their arrears of taxes squared off.

The capital grant from the government, which amounts to \$460, it was decided to match with a similar amount from the Municipality funds, and to use this more than \$900 to resurface the road from hereto Wellington, in order to save what we all of road better. Whether or not ready have and make this piece this amount will cover the cost of resurfacing is unknown, until a price had been arrived at for gravel to do the work with.

The Mill rate for the current year's taxes was set at the meeting, and the Tax Notices will be mailed out in the near future covering this assessment.

When the farmer is prosperous all the world is prosperous. That, however, is a fact which few people and too few governments have learned to appreciate.

PAUL MUNI'S LATEST MOVIE, "THE WORLD CHANGES," COMING

Paul Muni Coming in New, Dynamic Drama, Epochal In It's Sweep

When Paul Muni, undeniably among the greatest of all dramatic actors, appears in a new motion picture, fans know they are going to see a different sort of picture—one far removed from the average type of screen entertainment. His last picture, "I Am A Fugitive From A Chain Gang," was received enthusiastically everywhere and hailed as a screen masterpiece. And now his first picture since "I Am A Fugitive" is the current attraction at the Capitol Theatre. This picture, "The World Changes," a sweeping epic of America and its last 4 generations, produced by Warner Bros.—First National with true Muni skill, is hailed as giving the most thrilling drama of American life through the most interesting stages of American history, ever shown on the screen.

"The FIRESIDE PHILOSOPHER" By ALFRED BIGGS

Use everything; abuse nothing.
Only ignorance despises education.
Real generosity has no strings to it.
Adversity is a true test of friendship.
Fear of death is more fearsome than death.
Live every day as though it were your last.
Man can be the most cruel animal on earth—and the most kind.
The lives of multi-millionaires and criminals are full of fear.

LET IT RAIN

It has been years since we have had a real honest-to-goodness soaking rain like the one we have enjoyed the past week. It has shown us that it really knows how to rain even if many did doubt that it could soak us up so. With less than two inches of precipitation recorded, we heard people saying they would like to see it quit, it was raining so much that it wouldn't do any good, and would hold crops back, and a number of other very good reasons why it ought to stop—and yet if we had a few dry hot days, and these same people would be praying for rain, and cursing the country because it was so dry. If we had the handling of the weather we would either drown some of these people or burn them until they were unable to talk for a while. Why can't we be satisfied?

All spring and summer we have been listening to farmers bemoan the scourge of hoppers and the prevalence of gophers that were menacing fields and gardens—and now—with the finest weapon imaginable, viz. rain, working on these pests, these same farmers are praying for dry weather. Why? If we want to rid the district of these pests cheaply and effectively, why not pray for the rain to continue for a week longer until the young and old hoppers and the eggs are destroyed and the gophers drowned out of their holes and killed by the exposure. We read figures last week-end of the cost of the grasshopper campaign to date this year, and they were tremendous, and they feared that if the dry weather kept on the cost would be higher by the middle of June than it was for the entire year last year. And yet with cash so short for us all, and the government in debt head over heels, we would rather go on running the province into debt than to sit back and enjoy a good old-fashioned rain storm, and see the bonners controlled without money or price, and we and the government saved untold thousands of dollars by the blessedness of the rain.

No doubt of all the creations of God man is the "orneriest".

LIGHTS ON THE HIGHWAYS

We think that among questions which each motorist should answer, and that under oath to tell the truth, that one should be, "Do you, and will you continue to dim your lights when you pass another vehicle on the highway after dark?" The driving past other cars with lights on full glare is just about the most dangerous practice of the day, even moreso than passing at 45 or 50 miles per hour. But when you meet the guy that drives fast and also leaves his lights on bright, well, you just naturally go through hell from the time you see him coming until he gets past you, and leave a sigh of relief that can be heard a long way when he passes on and you are still right side up and safe.

While we are not sure, we are strongly of the opinion that standard equipment in all present day cars includes a dimmer for the lights, either foot or hand operated, and what a pleasure it would be if you could feel that when you are driving at night that everyone you passed would dim his lights to give you a chance to see where you were going and let you feel safe.

If there is no law on the statute governing this practice, there should be one, and our traffic cops should take the trouble occasionally to drive out on some highway and spend an hour or so just to see how very few make a practice of dimming when passing cars. And then, regardless of whether there are laws to govern it, as a matter of courtesy to your fellow traveler, and the regard everyone has for human life, the dimmer should be used when passing other cars. You not only run the chance of putting the other fellow into the ditch, but you as well run the risk of having him turn into you in his efforts to miss you, because the glare bewilders him and he doesn't know just where he is. If you think it's a joke to have a pair of bright glaring lights, shining in your eyes just as you come up out of a little dip or over a slight rise in the road, just wait until you try it, then you will wish everyone would dim and chances are you will dim your lights thereafter.

What About Social Credit in Canada?

This series is an explanation of the Douglas Social Credit Plan. Mr. Williams, (W.) a Social Credit advocate, is explaining the plan to his friend, Mr. Jones (J.). The scene is Mr. Williams' home, and the conversation takes place during an evening visit.

By following this series to the conclusion the reader will clearly understand the problem which faces Canada.

No. 17

W. "This National Dividend may be called 'the wages of the Machine' and if you recollect we have just been discussing the increased productivity of the community through the use of machines, which themselves are a product of centuries of co-operation and the gradual increase of knowledge. Here is how our New Economist puts it:

"This net increase is the result of the community's collective labors, and, in a private company would be termed a profit, and be distributed to the shareholders as a dividend."

Even so in this case, it is the National profit, and should be distributed as a dividend of financial credit to the nation's shareholders—its citizens—all of whom have contributed through some channel or another to its making and are therefore entitled to participate in the distribution. If no such distribution of financial credit or purchasing power is made then this increase in community's capacity to produce is of no benefit to that community because it cannot be drawn upon. Today the banker creates licenses, in the form of credits (money) to draw upon this hidden National reserve fund, and lends these to real owners and creators of the fund at a rental, called interest. The financier thus makes himself the potential owner of the natural increment of association.

J. "Oh, but bankers don't lend credit to themselves in order to get good."

W. "Of course not; who said they did? The question I just read means that this supply of potential wealth cannot be utilized unless the banker creates credit in order to bring these goods into the commercial system. Seeing that he has a monopoly of credit he has a monopoly of the potential wealth and it is only through him, and through the financial system which he controls that it is possible for the community to have access to this store of wealth."

J. "You mean that the prosperity of a country depends largely upon banking policy?"

W. "To a great extent, yes."

J. "Reading the financial report of the evidence given by representative bankers before the banking committee at Ottawa, one cannot find that they ever admit this."

W. "No, I suppose not. Neither do you hear very often of a banker admitting that his product may be injurious to the community. But we are wandering away from the subject of the

National Dividend. Are there any questions you want to ask about this?"

J. "Yes, there are. Lots of things I want to ask you but I wanted to be sure first that there was a sound basis for the National Dividend itself. By the way, I suppose that the money for this will come from the National Credit Authority—?"

W. "Yes, and it will be debt-free money."

J. "What do you mean?"

W. "That it is not borrowed money. It is a creation of new money."

J. "But that will produce inflation!"

W. "At last it's here! You mentioned inflation once before during the evening but we seemed to forget it at the moment. Now you again drag in that awful bogey—inflation."

J. "Well don't you fear inflationary practices? Look at Germany and—"

W. "Wait a minute. Let's get this straight. What is inflation?"

J. "Why, everybody knows what inflation is! It is when your money becomes worthless and prices rise sky-high and you can't buy anything unless you have bundles and bundles of money."

W. "I'll admit that is a pretty awful picture of conditions and that it has happened in some countries but that does not answer my question very satisfactorily. You have just told me certain characteristics of a violent inflationary period but that is not defining inflation."

J. "Oh well, I may as well give you your definition for I know that is all you are waiting for; you're not really interested in a definition from me."

W. "Now, Jones, don't be like that! Have you really got a definition for inflation?"

J. "Well, no... I suppose I haven't."

W. "All right. Here is our idea of inflation. Inflation is an increase in money without a corresponding increase in the amount of goods available for sale. Now, bankers have a different idea about what constitutes inflation. They use the word to refer to any issue of money in excess of the amount usually issued against a gold basis. The funny thing about this is that as we have seen, every time they make a loan they are causing inflation, and vice versa. But all this discussion of inflation is surely theoretical and academic unless it has some definite effect upon the individual citizen. You mentioned the fantastically high prices during the

STEAMLINE TRAIN SETS DENVER-CHICAGO NON-STOP SPEED MARK

CHICAGO, May 28—Ending the first sunrise to sunset non-stop run in American history, the Zephyr of the Burlington Railroad swept into Chicago at 7:09 p.m., May 26, central standard time, at 96 miles an hour.

The stainless steel train more than doubled the record of Britain's Royal Scot for non-stop runs, its own record for short run speed, and set an American record for sustained high speed.

It had travelled from Denver to Chicago without stopping, a distance of 1015 miles, in 13 hrs, 5 minutes, between sunrise in Colorado capital and sunset in Chicago. The Royal Scot's record of 56 miles an hour for 401 miles was displaced by a mark of 77.5 for the 1015 miles.

The Zephyr sped 96.3 miles at a sustained velocity of 90 miles and reached a peak speed of 112.5 miles an hour which it held for three miles, beating its own previous mark by three miles. Every inch of the long route was policed. Every highway and country lane was roped off to give the Zephyr the clearest right of way any train ever had.

45 CANUCKS TO PROFIT IN DERBY

Dublin, June 5—Forty-five Canadians were successfully yesterday in drawing horses in the Irish Hospitals' \$5,000,000 sweep on the Derby. Many of them drew non-starters while no ticket on Colombo, the strong favorite, went to Canada.

A total of 1,278 tickets on horses were drawn out of the big drums, the greatest number of any Irish sweep. This was because the sweep was based on 71 entries, and the distribution is split into 18 different prize units, all equal.

Great Britain took by far the greatest proportion of awards with 749 tickets. The United States had 284, Ireland 80, Canada 45, South Africa 42, India 23, France 22 and the rest of the world 32.

A kind old gentleman, seeing a small boy who was carrying a lot of newspapers under his arm said:

"Don't all those papers make you tired, my boy?"

"Naw, I don't read 'em," replied the lad.

Don't feel too highly flattered when someone asks for your John Hancock. A movie actress reports that one day she was solicited for her autograph by two small boys.

"Do you know who I am," she asked them.

"No'm," the older boy answered, "but we thought we could find out this way."

German inflationary period. Well that is the only thing that affects the individual—that is the price he has to pay for goods. Unless prices rise again, inflation is just an idle term, and cannot possibly be of interest to the average man. When inflation (in the ordinary sense of the word) takes place there is a corresponding increase in the amount of goods available, that is, there is no real basis for the extra money. The National Dividend, and the Just Price discount, on the other hand, would be drawn from and debited to the national credit which represents the real wealth of the country."

THE FEW

The easy roads are crowded
And the level roads are jammed
The pleasant little rivers
When drifting folks are
cramped;
But off yonder where its rocky,
Where you get better view,
You will find the ranks are
thinning
And travellers are few.

Where the going's smooth and
pleasant,
You will always find the
throng—
For the many, more's the pity,
See into like to drift along.
But the steep, that call for courage,
And the task that's hard to do
In the end results in glory
For the never-wavering few.

So let us all be ready
To meet things as they come,
And try to do our duty
In country, town or home.
For the soldier that has courage
Is always ready for the call,
And the road that points to
duty
Is open to us all. Ex.

THE WAY OF HUMAN LIFE

Thus talks an old farmer
about his boys: "From sixteen
to twenty they knew more than
I did; at twenty-five they knew
as much; at thirty they were
willing to hear what I had to say;
at thirty-five they asked my advice,
and I think when they get
to be 40 they will acknowledge
that the old man knew something
after all."

No flour is imported into
Switzerland, the domestic mills
having a monopoly of this market.

A colored employee of an express company approached his superior with the query: "Boss, what we gwine do about dat billy goat? He's done et up where he gwine."

Pat: "What do you charge for a funeral notice in your paper?"

Editor: "Fifty cents an inch."

Pat: "My heavens, man, my brother was six feet tall!"

Boss: "There's two dollars missing from my desk drawer and no one but you and I have a key."

Office boy: "Well, let's each put a dollar back and forget it."

NEGLECT OF COMMON CONSTIPATION IS A SERIOUS MATTER

Prevent This Condition with
Kellogg's ALL-BRAN

The first question your doctor asks is whether you are constipated or not. He knows that this condition may cause headaches, loss of appetite and energy, sleeplessness. It is often the starting point of serious illness.

You can prevent and relieve common constipation so easily. Just eat a delicious cereal once a day. Laboratory tests show that Kellogg's ALL-BRAN provides "bulk" and vitamin B to aid regular habits. ALL-BRAN is also a rich source of blood-building iron.

The "bulk" in ALL-BRAN is much like that found in leafy vegetables. Within the body, it forms a soft mass. Gently, it cleans out the intestinal wastes.

Isn't this "cereal way" safer and far more pleasant than taking patent medicines—so often harmful? Two tablespoonsful of ALL-BRAN daily are usually sufficient. With each meal in chronic cases. If seriously ill, see your doctor—ALL-BRAN is not a "cure-all."

Enjoy ALL-BRAN as a cereal, or use in cooking. Get the red and green package at your grocer's. Made by Kellogg in London, Ont.

Keeping Up Quality

THE REPUTATION OF CANADIAN WHEAT ON THE MARKETS OF THE WORLD IS DUE TO THE EFFORTS WESTERN FARMERS HAVE MADE TO KEEP UP THE QUALITY OF THEIR PRODUCTION.

And the reputation of UNITED GRAIN GROWERS is similarly based on the unremitting efforts to keep up the quality of its service to farmers in handling their grain and furnishing them with farm supplies.

The Recorder

Considerable anxiety was aroused in the Cardston district on Monday and Tuesday when Lyle Robinson, aged four, son of Mr. and Mrs. E. D. Robinson strayed away from the farm home and spent the night in the bush country south-west of Cardston without hat or coat, and in the rain which fell most of the night. Fred Walburger found him Tuesday morning, and he seemed to be little the worse for his experience.

Dances on the Open-air floor have been unavoidably postponed for the last week due to excessive weeping of Jupiter Pluvius. The rain, however, was decidedly welcomed by everyone.

While in Salt Lake City, Wm. C. Stone, and Miss Proctor of Stirling will take the course in choral work being conducted there by Noel Cain, noted musician of Chicago, who is judging the music in the Church finals of the M.I.A.

The supper for
LITTLE FOLKS

CHILDREN always love Kellogg's Corn Flakes. And there's nothing better for their evening meal than a bowl of this crisp, delicious cereal with milk or cream. Rich in energy. Easy to digest. Invites restful sleep.

Kept oven-fresh by the heat-sealed inner VAXTITE bag. Made by Kellogg in London, Ont.

News Notes

A prescription for grouches: "Kwityerboliakinan werk!"

Emil and Ed Cook returned this week from Sacramento, California, where they have been working. They expect to go back on July 15th, as their jobs will be waiting for them.

Mr. and Mrs. John S. Smith of Cardston were Raymond visitors Monday afternoon and evening.

Magistrate J. W. Low of Cardston, was here Wednesday and heard a small debt case. It didn't take very long to settle it.

The King's birthday was dry observed here when all business houses were locked up, and with the rain storm in progress nearly everyone stayed home.

There will be someone richer by twenty dollars or a beautiful silver set after Saturday night's show at the Capitol. Will it be you?

Work on the buildings in course of erection in town has been halted during the week while Jupiter Pluvius has been having an innings.

REWARD— with no questions asked will be paid to the party who borrowed a 30x3 1/2 tire and tube from trailer sitting in front of Karl Gehmlich's house Wednesday night and forgot to bring it back. Leave at Recorder Office.

Two breaks have occurred in the town water mains just prior to and during the storm, and being unable to do anything with them they are adding their share of water to what is flowing around so freely as a result of the BIG rain.

The interior of C. Bacon's Pool Hall looks bright and clean with its new coat of plaster. Theodore Elbert and son did the work the last of the week.

Joe Compton has a new home near the A.C. School which he will be moving into, immediately. June Anderson and Archie T. were the carpenters.

When it's wet and muddy like this we are not so envious of our neighbor who has a car so much nicer than ours.

F. S. Grisdale, former principal of the Olds Agricultural School, has been named Minister of Agriculture in the Brownlee cabinet. Geo. Hoadley, will now devote his entire time to the portfolio of health.

A large number of wagons from the Mennonite colony south of town came in Wednesday for cement. Due to the rain they were held here all day, so that the loads would not get wet and spoil.

Mr. and Mrs. T. George Wood arrived home last Friday after attending the Rotary Convention in Winnipeg, where T. Geo. received a nice favel from Governor "Bill" Emerson for the Raymond Rotary Outpost.

Families who arrived in Calgary last week-end told tales of hardship and privation in the northern British Columbia section of the Peace River flock. They were moving out after 4 years of failure.

Despite the rain a good crowd was at the Capitol Monday evening, and the ladies received a combination porridge dish and soup bowl. "Looking for Trouble," the picture of the evening, pleased everyone.

A. Batts will be moving back into his old shop over the weekend, which has been plastered and new window and door put in it. It looks much brighter than it did formerly.

A. L. Smith, K.C., prominent Calgary lawyer, received a fractured collar bone and several broken ribs, as well as a badly lacerated hand when his car ran into the ditch and turned over several times following a blow-out, on the Okotoks road Sunday evening. His wife, who was driving, escaped with a shaking up.

BEST DRESSED EQUESTRIAN

Grace Hanneford

Grace Hanneford, one of the shining stars of the famous Hanneford family of bare-back riders, is said to be the best-dressed equestrian in all spangland. Her costumes are the envy of her feminine admirers wherever she goes, in fact, the costuming, for the women in the act, is said to have cost a small fortune.

There are three female members in the troupe, Grace, the wife of "Poodles", world-famous riding clown, Elizabeth, Jr. and Mrs. Elizabeth, the mother of Elizabeth, and "Poodles" and their ring clothes, which are all original creations, and made

from the best of fabrics, denote the very latest in ring attire.

The famous Hanneford family, with "Poodles" Hanneford, dean of riding clowns, head the list of many noted equestrian acts with the Great Al G. Barnes Circus, coming to Lethbridge on Thursday, June 14 for performances at 2 and 8 p. m. The doors to the immense menagerie will open at 1 and 7 p. m.

The gas franchise has been approved by the Board of Utilities, and when it passes the Council it will be taken to the Ratepayers of Cardston, and if approved, Cardston may be using natural gas for heat and light before many months. Success to the venture is the way we feel about it.

RECORDER ADVERTISING PAYS

A Human Tendency

Too few business firms employ advertising to lessen their costs of selling.

Business enterprise today has two major problems: 1. To increase sales; 2. To lessen the cost of selling. Yet so many omit the use of advertising, despite their readiness to agree to the proposition that "advertising lessens the cost of selling."

We're frankly amazed at the avoidance of advertising in the face of the knowledge that it costs less to sell with the assistance of advertising than without it.

Strange, strange--- this human tendency to go contrary to what knowledge and experience has taught us is right!

To lessen your cost of selling, we commend to you an adequate campaign of regular advertising in . . .
